Beltone
FORCE™

The new super-power digital hearing instrument

 ***Beltone™***

Meet the new champion

Unleash your power

You are not alone. There are over 300 million people around the world with impaired hearing. Working, building a family, living life. If you happen to be one of the people with a severe to profound hearing loss, then you need power, and lots of it.

Now, there's a hearing instrument with just the right combination of super-power and flexibility to help you live your life the way you want to. Beltone FORCE brings out the winner in you.

A comfortable transition

Beltone FORCE is easy to get used to because it can be set to resemble the familiar sound of your existing instrument and your specific hearing ability.

Whatever your needs, the flexible nature of Beltone FORCE allows your hearing care professional to guide you through a transition period with gradual adjustments.

To high quality sound

Belton FORCE helps you make the most of your hearing ability with super-power that can be optimized according to your individual preferences and needs. It offers:

- **A more precise fit** because it has the flexibility your hearing care professional needs to apply the right amplification
- **Feedback management** that focuses on the mid frequencies to meet the specific needs of people with severe and profound hearing losses
- **High audibility** so you always have the power you need

Rely on it every day

You can depend on Beltone FORCE to provide you with the power you need every day - throughout the day. It's strong and reliable, long-lasting and easy to use in a variety of situations.

Strong and reliable:

The robust design of Beltone FORCE can withstand the kind of treatment that a super-power instrument might experience. For example, the volume control has a protective rubber cap that keeps out moisture and dirt, and the battery spring is gold-plated to protect it from sweat and prevent corrosion.

And all through the day

Longer battery time:

Beltone FORCE has long-lasting batteries. And it's no hassle to change them when you need to. The latest technology optimizes battery consumption, providing power for over 600 hours (according to IEC 60118-0 standards; actual battery life might vary).

Easy to use:

Beltone FORCE has a sensitive telecoil that transforms your instrument into a quality wireless receiver at public places like theaters, airports and places of worship. Compatibility with industry-standard FM equipment means that it's easy for you to get hooked up to external sources. Beltone Force also supports regular phones, phones equipped with induction magnets as well as cellular handsets.

Everyone has the right to good hearing

At Beltone, we always combine technically optimal solutions with a holistic approach. With Beltone FORCE, we applied all of our experience and know-how to develop a programmable digital super-power product. The result is an instrument that's powerful, easy to get used to and dependable.
